Education

VIT Bhopal University Expected May 2027
B.Tech, Computer Science and Engineering (AI and Machine Learning) *Bhopal, India*

Technical Skills

- **Languages:** JavaScript, TypeScript, Python, SQL
- **Frameworks and Libraries:** React.js, Node.js, Express.js, Tailwind CSS
- **Databases and Tools:** MongoDB, Firebase, REST APIs, Git, GitHub, Postman
- **Concepts:** Full-Stack Development, AI API Integration, MERN Stack Architecture

Experience

Infotact Solutions Aug 2026 – Oct 2026
Web Development Intern (Associate L1), Remote

- Working on live web development tasks as part of a performance-based remote internship, applying MERN stack skills in a professional team setting.

Projects

LPGenius | *AI-Powered LPG Delivery and Management Platform*

- Built a full-stack platform integrating an AI assistant for customer queries, order support, and general interaction, replacing traditional menu-based navigation.
- Designed a refill prediction system that uses historical order and usage data to estimate customer refill timing, shifting the platform from reactive to predictive.
- Implemented real-time delivery tracking (order placed, dealer assigned, delivery in progress, delivered) and a dealer command center for managing orders, customers, and operations.
- Added bilingual AI interaction to support regional language communication for Indian LPG customers.

VirtualAssistant | *AI Voice Assistant, MERN Stack*

- Developed a full-stack voice-based AI assistant using MongoDB, Express.js, React.js, and Node.js, enabling users to interact with the application through speech instead of manual navigation.
- Integrated the Google Gemini API on the backend to process voice-derived requests and generate contextual AI responses.
- Architected the request flow from frontend voice capture through Node/Express backend to the Gemini API and back, handling input processing and response delivery end to end.

BaZar | *Full-Stack E-Commerce Platform*

- Built a multi-repository e-commerce platform with separate customer-facing frontend, admin dashboard, and backend API layer, connected to a shared database.
- Implemented backend business logic and REST APIs to handle product browsing, order placement, and data flow between frontend, admin panel, and database.
- Designed an admin dashboard enabling platform administrators to manage products, users, and orders independently of the customer-facing site.

Certifications

- Programming with JavaScript — Meta (Coursera), Mar 2025
- Introduction to AI — IBM (Coursera), Dec 2024
