ARYA BARDHAN SINGH CHAUHAN

8303564464 | aryachauhan515@email.com | https://www.linkedin.com/in/aryabchauhan | github.com/Aryabardhansinghchauhan

PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science student (VIT Bhopal, graduating May 2027) specializing in the MERN stack (MongoDB, Express.js, React.js, Node.js). Built and shipped 5+ full-stack applications covering authentication, real-time data, REST API design, and third-party/AI API integration. Seeking a Full-Stack Developer / MERN Stack Developer internship or entry-level role.

TECHNICAL SKILLS

- **Languages:** JavaScript, Python, SQL, HTML5, CSS3, TypeScript
- **Frontend:** React.js, Tailwind CSS, Responsive Design
- **Backend:** Node.js, Express.js, RESTful API Design, JWT Authentication
- **Database:** MongoDB, Firebase (Auth / Firestore)
- **Tools & Platforms:** Git, GitHub, Postman, VS Code, Vercel

PROJECTS

Medical Waste Detector | *Python, YOLOv8, PyTorch, OpenCV, Flask* *Feb 2026*

- Engineered a real-time computer vision system utilizing YOLOv8 for automated categorization of hazardous biomedical waste.
- Curated and annotated custom multi-class datasets; optimized training pipeline with transfer learning, achieving high mean Average Precision (mAP@50).
- Deployed a lightweight inference endpoint using Flask and OpenCV, enabling real-time video stream processing and rapid classification.

AI Virtual Assistant | *SpeechRecognition, OpenAI / Gemini API* *2025*

- Developed an intelligent, voice-activated virtual assistant capable of executing system-level tasks, voice queries, and dynamic web automation.
- Integrated SpeechRecognition and Pyttsx3 for low-latency Speech-to-Text (STT) and natural Text-to-Speech (TTS) response pipelines.
- Incorporated LLM APIs to handle contextual multi-turn conversational queries, sentiment analysis, and intelligent intent parsing.
- Built automated subroutines for desktop controls, calendar scheduling, email automation, and real-time information retrieval (weather, news, system diagnostics).

BaZar — Full-Stack E-Commerce Platform — *GitHub* | *Live Demo*

React.js, Node.js, Express.js, MongoDB, Tailwind CSS

- Developed a full-stack e-commerce web application featuring real-time product discovery, dynamic filtering, and seamless cart/checkout workflows.
- Implemented secure user authentication and authorization using JWT and bcrypt, alongside role-based access control for customers and admins.
- Designed responsive, modern UI with React.js, Tailwind CSS, and Redux Toolkit for efficient global state management, backed by optimized Express.js/MongoDB REST APIs.

EXPERIENCE

Web Development Intern (Associate L1) | Infotact Solutions *Aug 2026 – Oct 2026*

- Collaborate with the web development team to design, build, test, and deploy responsive web applications using React.js, Node.js, and modern JavaScript.
- Engineered clean, modular codebases and scalable backend APIs adhering to industry best practices and design patterns.
- Participate in weekly code reviews and sprint meetings to troubleshoot, debug, and optimize application performance and user experience.
- Author and maintain comprehensive technical documentation for codebases, RESTful APIs, workflows, and system architectures.

EDUCATION

B.Tech in Computer Science — VIT Bhopal University *Sep 2023 – May 2027*

Bhopal, MP

Intermediate & High School — St. Mary's School, Mainpuri *Completed 2023*

CERTIFICATIONS

- Programming with JavaScript — Meta (Coursera), Mar 2025
- Introduction to AI — IBM (Coursera), Dec 2024
